

Quality Assurance Managed Services Solution

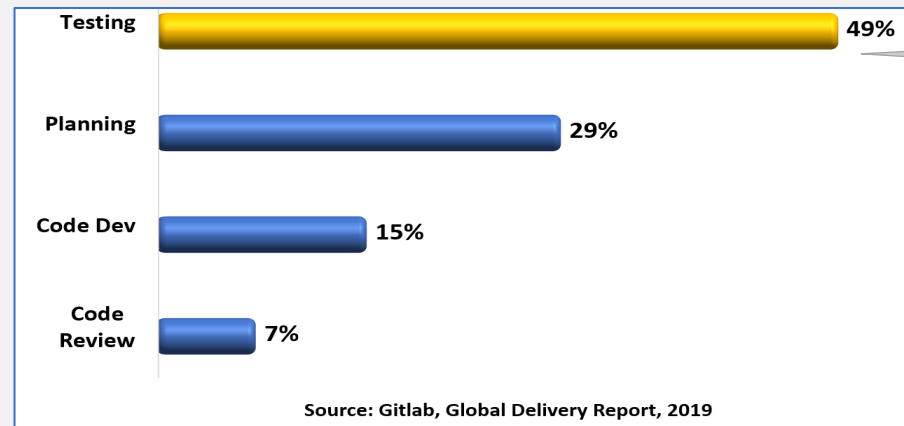

June 2021

iNSta

AI-based Scriptless Test Automation

Is Testing the biggest source of delay in the delivery value chain?

Yes, Testing continues to be a challenge

Factors

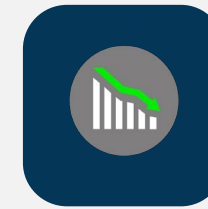

Application complexity is increasing faster than test teams and tools can keep up

Testing is manual

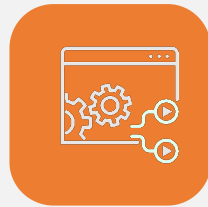

Lack of skilled automation resources

Reliability of automation execution is low

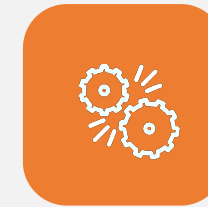

Testing productivity is low due to dependencies (code quality, env. & data)

Identifying the right level of Test coverage (Test what needs to be)

Lack of collaboration among development and test teams

Inflexible automation test scripts can't evolve to app enhancements

New age test platforms need to be adopted for increased productivity and overall quality

Plan

- Smart Planning
- Traceability
- Impact Analyzer
- Test Suite Optimizer
- Test Management Integration

Design

- Write tests in Plain English
- Record & playback
- Test Orchestration
- Import actions to generate tests
- Generate Test Scripts
- Smart conditions & loops
- Custom Functions

Execute

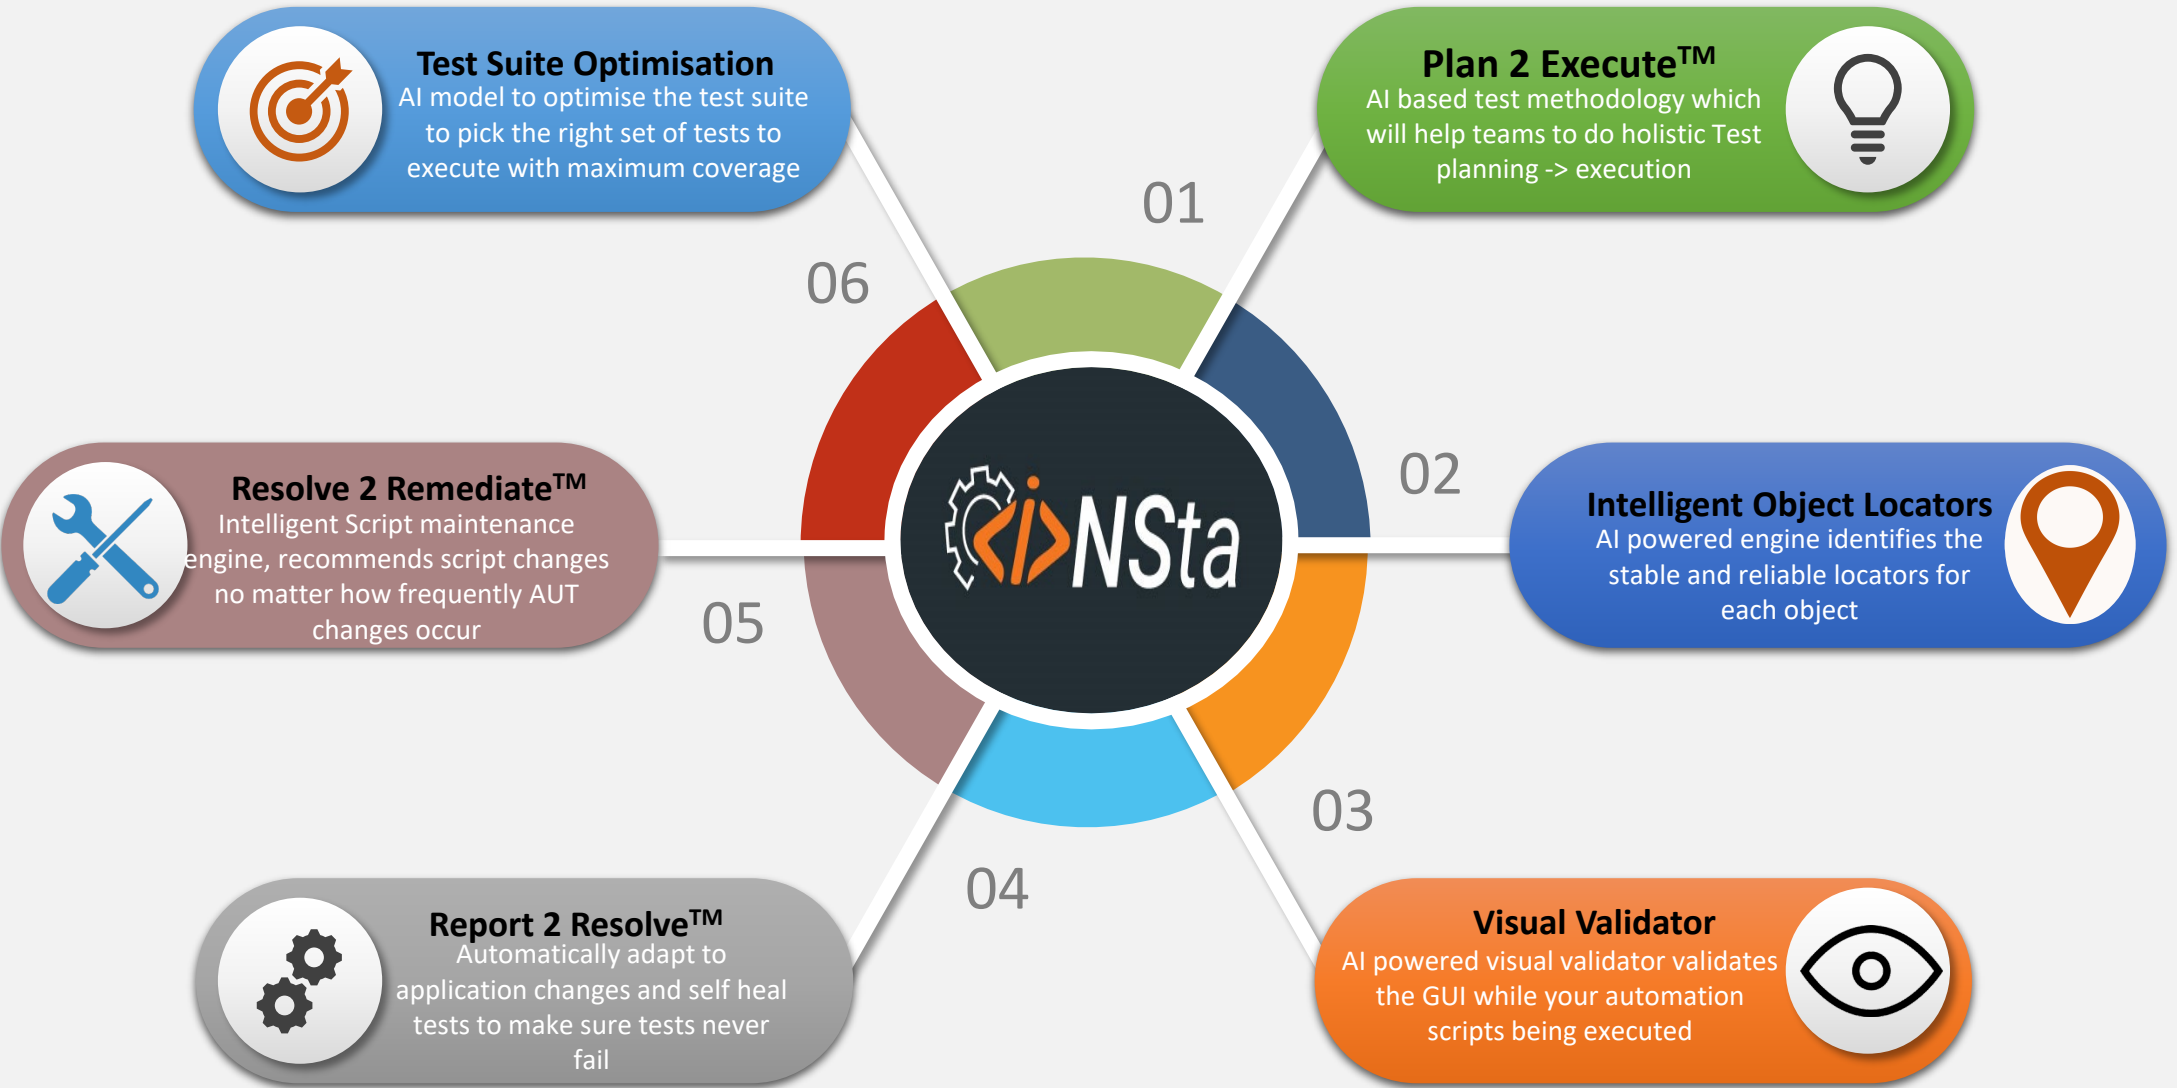

- Schedule Test executions
- Cross Platform executions (Browser & OS)
- Parallel executions
- Docker & Cloud Integration
- Sauce Labs, Browser Stack Integrations

Report

- Real time Dashboard
- Cigniti, Extent, Custom Reporting
- Video Recorders
- Advanced Analytics

iNSta – Key Differentiators

iNSta – Value Proposition

**Democratizing
Test
Automation**

**Improved Stability
& Reliability**

**Improved Test
Coverage**

**Improved
Productivity**

**Reduced Cost
of Quality**
